

FOR INDIVIDUALS AND FAMILIES

Sort it once. Spare them the chaos.

Imagine someone you love had to sort out your affairs tomorrow. Would they know where the will is, which accounts exist, the password to your phone, or your funeral wishes? For most of us the honest answer is no. SEQR is one secure place for everything that matters, with you in full control of who sees what, and when, including after you are gone.

EVERYTHING IN ONE SAFE PLACE

Important documents

Wills, deeds, insurance policies, legal and financial paperwork, and identity documents, all in your encrypted vault.

A guided start

A document checklist and a funeral plan section, so you never stare at a blank box.

Useful day to day

Passport expiry alerts and reminders keep your vault current, not just ready for an emergency.

Secrets and instructions

Account details, passwords, and the wishes that are not files, kept safe and ready.

Messages they keep forever

Record video and voice messages for the people you love.

YOU STAY IN COMPLETE CONTROL

Nominate who you trust

Choose family, an executor, or a solicitor.

Approve every request

When someone asks for access, you are alerted and can approve, deny, extend, or revoke.

Decide what each can see

Permission is set document by document. Nothing is shared by default.

If you pass away or cannot respond

The documents you pre-approved are released to your trusted contacts through a secure verification process. Nothing else is ever shared.

KEPT SAFE, SIMPLY PUT

Your documents are encrypted, so even if someone broke into the storage they would see nothing but scrambled gibberish. Every file gets its own lock, and two-factor authentication means a password alone is never enough to get in. Nothing is ever shared unless you decided it in advance.

One secure vault

For documents, secrets, and messages your family keep forever.

You decide

Who can see what, and when. Nothing is shared by default.

Built for the handover

Released to the right people at the right time, even if you no longer can.

WHY SEQR

Your cloud drive was never built for this.

Plenty of apps store files. Almost none make sure the right person can reach them when it matters most. That is the gap SEQR was built to close.

HOW SEQR COMPARES

Cloud storage

Drive, Dropbox, and OneDrive keep your files, but access dies with your login. SEQR releases them to the people you chose, even when you no longer can.

A solicitor's file

Holds your will, but not your accounts, passwords, or messages. SEQR holds everything around it, and helps keep it current.

A safe or a drawer

Can be lost, forgotten, or locked at the worst moment. SEQR is always there, organised, and shared only as you decided.

Doing nothing

Leaves your family to piece it all together in their hardest week. SEQR lets you do the thinking now, calmly.

WHY YOU CAN TRUST SEQR

- UK-based. A British company, built around UK wills, probate, and executors.
- Two-factor authentication. A password alone is never enough to reach your vault.
- A full audit trail. Every action on your account is recorded, so nothing happens unseen.
- Bank-grade encryption. Your files are scrambled with AES-256, the standard used by banks.
- Deny-by-default access. Nothing is shared unless you decided it in advance.

Simple one-time plans, with no monthly subscription. Start free, and choose more storage or trusted contacts only if you need them.

*You do the thinking once, calmly.
They are spared it entirely.*

Protect your family from unnecessary stress.

Set up your secure vault today.
